

I. Network

Antwerp TM joins forces with the [State Archives of Belgium](#). Automated data extraction from historical maps will be explored within the [DIGHIMAPS](#) (UAntwerp/State Archives) project.

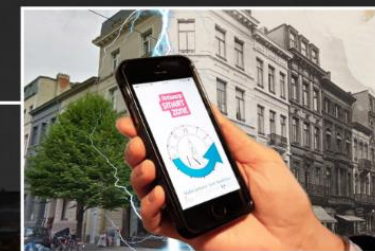

II. Research

[Historical photographs](#) of Antwerp (DAMS database) will be automatically [clustered](#) and [geolocalized](#) in collaboration with ACDC, using PixPlot (Yale DHLab) and GIS.

III. Public

Our [smartphone application](#) 'Tijdmachine Sint-Andries' is up and running. Discover (a part of) the old inner city of Antwerp and its [former inhabitants](#) in 1584, 1796 and 1898.

IV. Policy

In the [Digital Heritage for Smart Regions](#) project we test emerging technologies in order to provide recommendations for the use of [historical data](#) for e.g. tourism and [spatial planning](#).
