UABCEI CAMPUS OF INTERNATIONAL EXCELLENCE

Objectives

The research groups and research centres involved in Digital Humanities of the **Autonomous University of Barcelona** want to **increase the number** of DH projects and their **visibility**. For these purpose a bottom-up network on DH has been created with the help of the VR of Research and Transference.

The Digital Humanities Network of the UAB and its Campus of International Excellence intends to effectively **articulate the capabilities** of research groups, research centres, scientific and technical services, technology parks and major infrastructures involved in research, education and dissemination activities in the Digital Humanities and its subset, the Digital Heritage.

The network pretends to **increases the competitiveness** of its members**, joining efforts in terms of visibility**, **coordination of activities** and **sharing of resources and information**.

Training

**Massive Open Online Course on Digital Humanities
Master's Degree in DH and Digital Heritage**

Research and innovation

The Digital Humanities Lab

An open, flexible and free space coordinated by the Humanities Library and the Office for Research and Transfer through the CORE in Cultural Heritage.

Space that involves **researchers, students, administrations, companies and community,** especially in the field of Humanities and Social Sciences, in all phases of the **creation and innovation process** to generate **new projects and ideas based on ICT** and applicable to the social and productive environment to connect the quartet formed by **Art, Science, Technology and Society**.
