

BUILDING A TIME MACHINE

... a collective digital information system mapping the European economic, social, cultural and geographical evolution across times.

? How can YOU help us feed the Time Machine and fill it with life?

If you have conducted, or are currently running a project aimed at mining and visualising data about the past of a specific city or place, you can propose it as a

LOCAL TIME MACHINE PROJECT

and thereby

- make a direct contribution to the development of the Time Machine, and
- be part of a growing ecosystem of Local Time Machines across Europe.

! Proposing a project is simple!

Visit our website www.timemachine.eu and use our online form to submit your proposal.

Example for a Local Time Machine project: Lausanne in 1721, 3D reconstruction and morphology.

BENEFITS OF LOCAL TIME MACHINE (LTM) PROJECTS

Exposure at European scale

- Local Time Machine projects are published on our Time Machine website, each with their own dedicated page. The content of this page can be edited directly by you at any time, adding information on upcoming events and other relevant news as you see fit.
- Local Time Machine project news will be highlighted in the newsroom of our website, thus amplifying exposure and outreach of your project.

Learning community

- Through workshops and other events, Local Time Machine projects are building up a peer-to-peer learning network to exchange knowledge, tools and best practices.
- Knowledge gained within your project or your community can be shared with from other Local Time Machines throughout Europe, and the other way around.

Access to further opportunities in the Local Time Machines environment

- As the Time Machine becomes populated with more data, a code library, operators and apps will be made available within the Local Time Machine environment, which will enable or facilitate the exploration and exploitation of your data.

Support the Local Time Machines' growth

Are you aware of any relevant projects or activities that are not yet part of the Local Time Machines ecosystem?

Please help us reach out to them and/or invite them to get in touch with our Local Time Machine Team at:

Your suggestions count!

Do you have any ideas on how to strengthen and expand the Local Time Machines ecosystem and its offers to our members?

Please send your feedback and suggestions to:
